Your new Directory gives the following interesting synopsis of our general position in the East as taken from its list of Foreign Residents -To begin with matters ecclesisatical. We are well cared for, having a Pope, four Bishops, three Abbotts, each with his Cope, a Prior, four Dogne. two Parsons, three Deacons, twenty-two Clerks of various degrees, thirteen Palmers, and four Belle, a Church, a Chapelle, and twelve Halls, but only one Badman to look after. The General Managers beg to autmit to the shareholders a statement of the accounts for the year 1882.

After paying salaries, repairs and all other outgoings there remains, including \$1,885.18 brought forward from last account, the sum of \$21,687.05 at oredit of profit and loss account. The General Managers consider it highly important

in the interests of the company to create, as seen as possible, a reserve fund sufficient to write down the smount paid for the good will of the business and to make provision for depreciation. They therefore re-commend the declaration of a dividend of \$12 per there, absorbing \$15,000, and the apportionment of \$9,000 to reserve, leaving a palance of \$987.06 to be carried forward to next year.

FERTILITY OF THE PAMPAS OF

THE PLATE. As an instance of the fertility of the vast pampas of South America and the prolific breeding of stock there in their natural state, it is affirmed that e eight cows and the bull which the two Portuguese brothers Gomes coast of Brazil, to Paraguay, have developed into twenty million heads of horned cattle. and it is estimated that nearly twenty times that number could find sustenance in the River Plate. Sheep farming is also so prossperous a business that there are now upwards of sixty million sheep in the district. though it is only within the last thirty years that they have been thought worth notice. A flock of a thousand sheep does not require more than 500 acres of land, and the profits are very great, as much as 100 per cent, on the capital invested being realised in some cases. The origin of the horse in the basin of the River Plate is traced to the presence of Mendoza, who left his horses behind him, and they are now so numerous that the colonists kill them for their skins and fat,

FORLORN INDEED. The world must indeed be stony-hearted when a human being who has already tested the hospitality of Dartmoor profers to return there sooner than remain at large any longer. This choice has just been made by a ticket-of-leave man at Bootle. He was released from Dartmoor some time ago, by reason of his exemplary conduct, and received the usual monetary help from the Prisoners' Aid Society towards making a fresh start in life. But having only one log, he found hit impossible to find employment; and wandered about from place to place, as miserable a creature as sun often shirtes upon in this prosperous country. At last he was taken into custody for elseping in the streets by the side of a fire which had been lighted for some purpose, and at once told his capter that he wanted to go back to Dartmoor, "A convict prison," he declared, " was nothing like so hard on a chap as the people outside," and to this theory he held when brought before the magistrates.
